DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7, 9-14, 17-39 and 42-44 are allowed.

Claim 1 recites the limitation of "wherein the detecting circuit (i) detects, upon contact of the detecting object with both the first detection electrode and the second detection electrode, a third signal waveform excited to the second detection electrode, (ii) compares the third signal waveform with a threshold voltage that is preset based on a capacitance component and a resistance component of the specific detecting object, and (iii) detects whether the detecting object has been brought into contact with the detecting surface and determines whether the detecting object is the specific detecting object when the threshold voltage is included within a range of a voltage amplitude of the third signal waveform; and wherein the threshold voltage is set either to a voltage that is higher than an upper limit value of the third signal waveform excited to the second detection electrode in a state in which the detecting object does not come into contact with the detecting surface, or to a voltage that is lower than a lower limit value of the third signal waveform excited to the second detection electrode in a state in which the detecting object does not come into contact with the detecting surface." This limitation was essentially contained in the previously filed dependent claims 15-18. While these dependent claims 15-18 were previously rejected in view of Morikawa, the Applicant brought forth arguments (at pages 22-24 of the Applicant's current reply) as to why Morikawa fails to disclose the limitations above. The Examiner has found the Applicant's arguments persuasive. One additional prior art found by the Examiner,

Fukuzumi (US Patent 6,181,808), discloses applying a measuring the voltage between two electrodes touched by the finger to determine finger presence using a methodology that would not read on the claimed limitations (see Fukuzumi figure 6 and column 4 line 48 through column 5 line 25). Dependent claims 2-7, 9-14 and 17-38 incorporate all of the limitations of claim 1, and are thus similarly found to be allowable. Independent claim 39 contains essentially the same limitations as above with regards to claim 1 and is found to be allowable for the same reasoning. Dependent claims 42-44 incorporate all of the limitations of claim 39, and are thus similarly found to be allowable.
